# Blues Americana

**Blues Roots of American Popular Music From Ragtime to Rock.**

Created especially for your Senior clients to appreciate the familiar music of their youth and adulthood through the lens of the Blues, *America's only unique art form* – its history, influences and enduring power to tell a personal story.

I adapt each show to various audience members' degrees of participation. For high-awareness clients I might play songs of widely varying styles along with more erudite comment, while for more challenged, assisted- or memory care clients I'll present a more high-energy set of up-beat music. **At all times I keep it light, fun and informative for all audiences.** How can I tailor my show to *your* clients?
